OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Migration	Anadromous
<u>Sockeye</u>	<u>8-14-93</u>	<u>2</u>			

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as any other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: Observed 2 Sockeye Cutting/Spawning in the waters above the first bridge.

ALASKA DEPT. OF
FISH & GAME

JAN 08 1997

REGION II
HABITAT AND RESTORATION
DIVISION

Name of Observer (please print) Andy Matthews Fish & Wildlife Officer
Date: 9-21-93 Signature: Andy Matthews
Address: P.O. Box 903
Craig AK 99921

This certifies that in my best professional judgement and belief the above information is evidence that this waterbody should be included in or deleted from the Catalog of Waters Important for Spawning, Rearing or Migration of Anadromous Fishes per AS 16.05.870.

SUBJECT: Fish & Wildlife Protection
Stream Nominations

Attached are two anadromous waters nomination forms submitted by Fish and Wildlife Officer Andy Matthews of the Fish and Wildlife Protection office in Craig. Both are based on his observations of sockeye salmon during this year's spawning season. Of note is that neither system has a lake component.

Ed Weiss has indicated that he will accept nominations year-round, not just during the early fall nomination period, so will you sign these as appropriate, and forward them on? Thanks.
